1. PRODUCT DESCRIPTION/APPLICATION

FABRIC SOFTENER is a thick light blue liquid with a pleasant floral fragrance. It contains a speciality fabric softener and conditioner as well as a bacteriastat.
FABRIC SOFTENER performs two roles in one operation. It softens fabrics as well as eliminating static charge on the fabric. FABRIC SOFTENER is used during the final rinse cycle after the laundering of towels and bed linen and to reduce the static cling in polyester and other synthetic garments. FABRIC SOFTENER leaves fabrics fragrantly fresh, easy to iron and wrinkle free. FABRIC SOFTENER can be used in both top and front loading washing machines. FABRIC SOFTENER can also be employed in on premise laundries as found in motels, nursing homes, hospitals and hotels.

2. METHOD OF USE

DIRECTIONS FOR USE
1. Top and front loading machines – use 1½ capfuls (10-15ml) per normal wash load.
2. Handwashing - use ½ - 1 capful (5-10ml)
3. Industrial and commercial laundries - use 2ml per kilo of dry wash load in the final rinse cycle
