1. PRODUCT DESCRIPTION/APPLICATION

- BRILLIANCE is a pale amber liquid based on a blend of heavy duty alkaline detergents combined with soil suspending agents, anti-scaling components and a stabilised chlorine de-staining agent.
- Suitable for use in soft and hard water conditions.
- BRILLIANCE is Low foaming making suitable for use with conveyor dishwashers

2. METHOD OF USE

BRILLIANCE is formulated especially for use with Automatic Dispensing Equipment. This is a complete hands-free system which ensures optimum concentration and economy of use of detergent is maintained at all times. The dispenser involves the use of a potentiometric probe which "senses" detergent concentration in the wash tank and signals the pump when to add more detergent.

BRILLIANCE is dosed automatically through the dispensing unit and maintained at a concentration of 1 - 2 gm /litre.

Operating temperature is normally between 75 - 80°C.

BRILLIANCE should always be used in conjunction with SPARKLE (Rinse Aid) to ensure all washed articles are completely clean and dry.

3. TECHNICAL DETAILS

- Concentrated liquid - ensures economical dose rates.
- Contains anti-scaling agents - minimises the need to de-scale the dishwasher.
- Contains soil suspending agents - prevents redeposition of soils.
