

SPA.GIENE®

The original and first product especially designed for cleaning and sanitising spa equipment.

SPA.GIENE

SPA.GIENE is a broad spectrum antimicrobial commercial grade disinfectant for hard surfaces. Designed to effectively and hygienically flush-clean the pipes, pump and surface of jacuzzi spa baths, spa pools, and hydro spas.

The use of SPA.GIENE eliminates the harmful bacteria *Pseudomonas Aeruginosa*, a major cause of infection from spa bath use. It is also very effective in removing scum marks that build up in baths, shower bases and around pool edges.

It is non-hazardous, non-dangerous, biodegradable and suitable for use in septic and water treatment environments.

The NEW formulation is low fuming (more gentle to the user) and low foaming, therefore requiring less water to flush the equipment.

Other uses include deodorising and cleaning of washing machines, auto-dishwashers, Vichy showers, wet tables, wet areas and toilets.

The efficacy of SPA.GIENE was certified and tested in an accredited NATA laboratory.

Spa Beauty Wellness Hygiene

HY.GIENE Australia is dedicated to the manufacture of exceptional cleaning products that are socially responsible, environmentally sustainable, and demonstrates our commitment to meeting the overwhelming environmental concerns facing our world.

HY.GIENE Australia lead the beauty, spa and wellness industries delivering solutions for your hygiene and cleaning needs.

With the support of the spa & beauty and wellness industry, HY.GIENE Australia has positioned itself as a leading supplier of hygiene products to personal care industries.

Our spa and beauty cleaning products are developed using the latest natural surfactants where possible, to enable the production of extremely efficient and biodegradable products.

PEDI.GIENE

The first product especially designed for cleaning and Sanitising Pedicure Equipment.

PEDI.GIENE

Outbreaks of skin infections on the legs and feet of patrons following spa pedicures have caused concern about pedi-spa safety.

HY.GIENE Australia provides information for customers of salon pedicure foot spas which can help reduce the potential for infections associated with pedicure foot spa use. Micro-organisms in foot spas can enter through the skin. It is for this reason that all salon workers understand that pedicure foot spas and basins be cleaned and sanitised after every use.

Cause of Infections:

Some incidents of foot spa infections have been caused by *Mycobacterium fortuitum*.

This organism can occur naturally in water and soil. Other organisms have also been found in footbath systems. The screens and tubes of foot spas are particularly good places for the bacteria to collect and grow, often forming dense layers of cells and proteins called biofilms, which can be very hard to remove. A foot spa should be sanitised between each customer, and nightly. Proper cleaning and disinfection can greatly reduce the risk of getting an infection by reducing the bacteria that can build up in the foot spa system.

PEDI.GIENE is available in the following convenient sizes, 1L salon starter pack, 1L refill, 5L salon starter pack, 5L salon refills and 15L bulk pack

(Measure cups and taps available for easy handling.)

BEAUTY.GIENE®

Especially designed for cleaning and disinfecting of all surfaces, furniture and equipment.

BEAUTY.GIENE

BEAUTY.GIENE is a premium antibacterial hospital grade, low foaming, non-caustic cleaner developed specifically for the Spa and Beauty industry. It's powerful detergent nature enables the efficient removal of dirt, oil and grease from all surfaces whilst cleaning, disinfecting and eliminating harmful bacteria.

BEAUTY.GIENE is friendly to the environment 100% biodegradable and non-hazardous. Suitable for cleaning and disinfecting the entire beauty salon – floors, walls, tables, spray & wipe, toilet, kitchen and instruments.

BEAUTY.GIENE is available in the following convenient sizes, 1L salon starter pack, 1L refill, 5L salon starter pack, 5L salon refills and 15L bulk pack. (Cap spanners and taps available for easy handling.)

LAUNDRY

Advanced and Complete Laundry Care System for Spa, Beauty and Hair Salons.

Oil Retention In Towels

Our HY.WASH 3 step process is simple and very effective for removing oil in massage towels and sarongs.

Longer Life In Your Towels

Our Laundry Care process will protect the fibres of your towels, giving you superior colour retention so they look beautiful for longer.

Exceptional Quality and Features

Both our laundry liquid detergent and laundry powder are Premium grade non hazardous products, fully biodegradable and suitable for front and top loading machines in hot or cold water.

The ingredients are highly active, low sudsing with powerful optical brightener and soiling suspending agents for free rinsing. Being a concentrate, the dosage rate for the liquid and powder products is reduced giving you great value and great results! Uniquely formulated to remove heavily embedded soils such as grease, oils, and fats from synthetic cotton blends and pure cotton. Especially designed for cleaning and disinfecting of all surfaces.
